Professional Summary

Full Stack Developer with 2+ years of experience developing scalable web applications using Python, Django, REST APIs, PostgreSQL, and modern web technologies. Experienced in backend architecture, database optimization, API development, payment gateway integration, cloud deployment, and production support. Familiar with Django, APIs, React.js and PostgreSQL. Strong problem-solving skills with hands-on experience building secure and high-performance applications.

Technical Skills

Programming Languages: Python, JavaScript, SQL

Backend Development: Django, Django REST Framework (DRF), REST APIs, Fast APIs, API Integration, Authentication, Authorization

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap, AJAX

Databases: PostgreSQL, MySQL, SQLite, MongoDB

Tools Version Control: Git, GitHub

Cloud Deployment: AWS, Amazon EC2,S3, cPanel, Bitnami Server

DevOps Practices: Docker (Basic), CI/CD Concepts, Agile Methodology, Secure Coding, Performance Optimization

Core Competencies: Backend Development, Database Design, System Integration, Problem Solving, Software Development

Professional Experience

Thaagam Foundation

May 2024 – July 2026(2year 3month)

Python / Full Stack Developer

- **Thaagam.org Donation Platform**

<https://thaagam.org>

- Designed and developed scalable backend modules using Django and PostgreSQL.
- Built ML-based recommendation engine using CLIP embeddings and KMeans clustering.
- Implemented Razorpay payment integration with secure order verification and webhook handling.
- Built dashboards for donation tracking and campaign analytics.

- **GCC PHD Attendance Management System**

<https://smartattendance.gccservices.in>

- Developed RESTful APIs for attendance, leave tracking, and workforce monitoring.
- Integrated face recognition using Dlib and Haar Cascade.
- Optimized PostgreSQL queries for high-volume attendance data.
- Built admin dashboards with real-time reporting.

- **GCC Workforce Management**

<https://privateworkforce.gccservices.in>

- Developed workforce tracking modules with photo verification and QA approval workflows.
- Implemented secure file uploads and role-based access control.

- **Tambaram Shelter Management System**

<https://tambaramshelter.m7corporation.com>

- Developed shelter management platform for resident records, food distribution, and salary tracking.
- Built secure admin dashboards with authentication and reporting modules.
- **GCC Night Shelter Portal**
<https://nightshelter.gccservices.in>
 - Implemented REST APIs for attendance, occupancy tracking, and resource management.
 - Developed dashboards for shelter utilization and workforce allocation.
 - Managed production deployment and database administration.
- **M7 Corporation Dashboard**
<https://m7corporation.tech/dashboard>
 - Built service management dashboards with CRUD operations and analytics visualization.
 - Implemented modular backend architecture and reporting systems.
- **M7 Digital Dashboard**
<https://m7.digital/dashboard>
 - Developed reporting and analytics dashboards for internal business operations.
 - Designed backend modules for data management and tracking.
- **AcustomSong.com Platform**
<https://acustomsong.com>
 - Developed custom song ordering platform with admin management system.
 - Integrated Razorpay payment gateway and order tracking workflows.

Projects

Portfolio Website [aslam.alwaysdata.net]

Django — HTML — CSS — SQLite

- Developed responsive portfolio website using Django.
- Showcased projects, technical skills, and professional experience.
- Implemented clean and responsive user interface.

Education

M.Sc Computer Science	2024
Jamal Mohamed College, Trichy (GPA: 8.1/10)	
B.Sc Computer Science	2022
MIET Arts and Science College, Trichy (GPA: 9.1/10)	

Certifications

- Python Training – Besant Technologies (2024)
- Vocational Skill Building Programme – ICICI Academy (2022)

Additional Information

Languages: English, Tamil

Core Competencies: Backend Development, REST API Development, Database Design, API Integration, Performance Optimization, Problem Solving

Interests: Learning New Technologies, System Design, Software Development
